

ECLIPSE CHROME

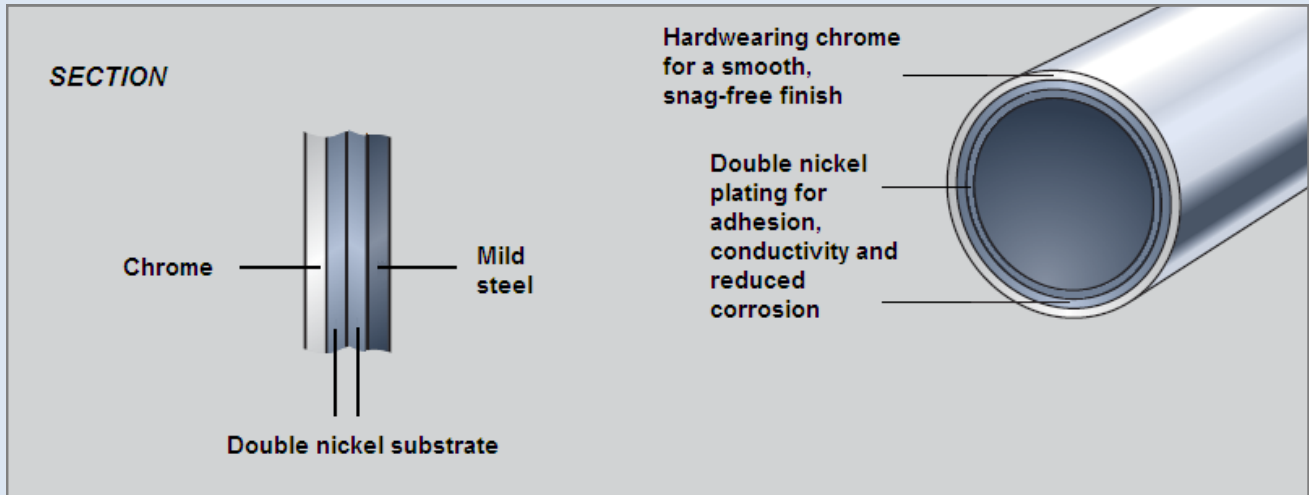

HARDWEARING, HYGIENIC SHELVING IN POLISHED NICKEL CHROME

- ***Hardwearing finish***
Polished nickel chrome, for a smooth, snag-free finish
- ***Open-wire design***
Excellent air-flow & easy to clean
- ***Strong & robust***
Up to 300kg shelf load capacity
- ***Quick & easy to assemble***
Bolt-free, no specialist tools required
- ***Fully adjustable***
Shelf heights every 25mm
- ***Innovative design***
Reduce costs and improve access by using Add-On Units
- ***Multi-purpose***
A huge range of sizes, shapes and accessories

ECLIPSE CHROME

HARDWEARING, HYGIENIC SHELVING IN POLISHED NICKEL CHROME

TECHNICAL SPECIFICATIONS

Shelf loading

300kg UDL per shelf up to 1200mm length
240kg UDL per shelf over 1200mm length

Materials

Outer wire structure - 5.8mm thick
Cross support wires - 4.3mm thick
Main shelf wires - 3.3mm thick

Manufacturing process

Mild steel is washed and treated, then plated with nickel. A second plating of nickel substrate is applied for reduced corrosion, and finally a chrome plating, before being polished to a smooth high shine finish.

The process is applied to shelves and posts.
